Success Criteria:

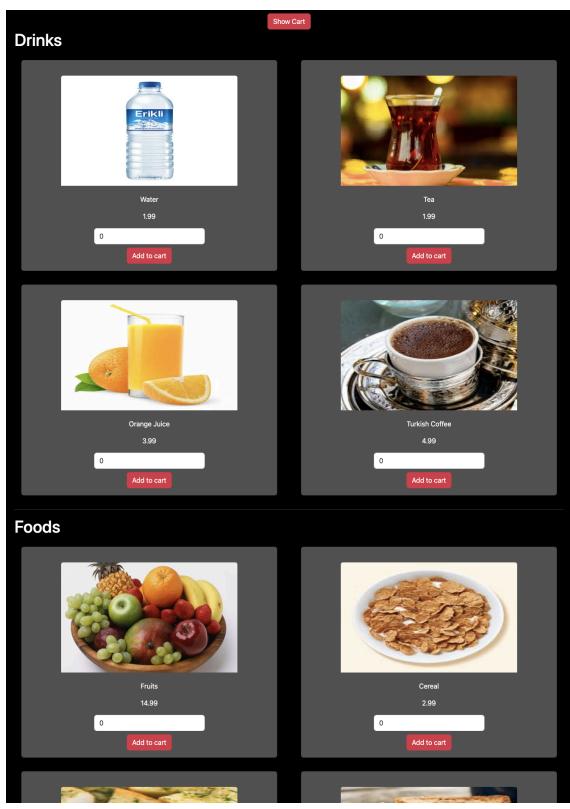

Success Criteria	Implementation	Feedback from Client
Users can access the application using a QR code.		The feedback was positive, expectations were met.
If QR code fails/isn't available, users should still be able to access the application using wi-fi.		The feedback was positive, expectations were met.
To manually log in, users should be able to enter their room number and predetermined password as username and password to access their account.		The feedback was positive, expectations were met.

Users can see (with the name, image and price) all items on the menu.

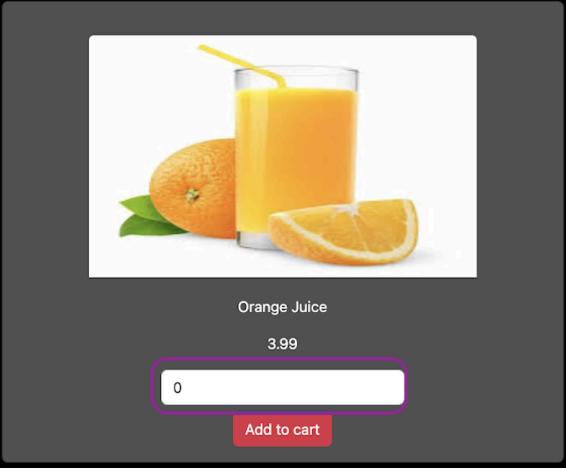

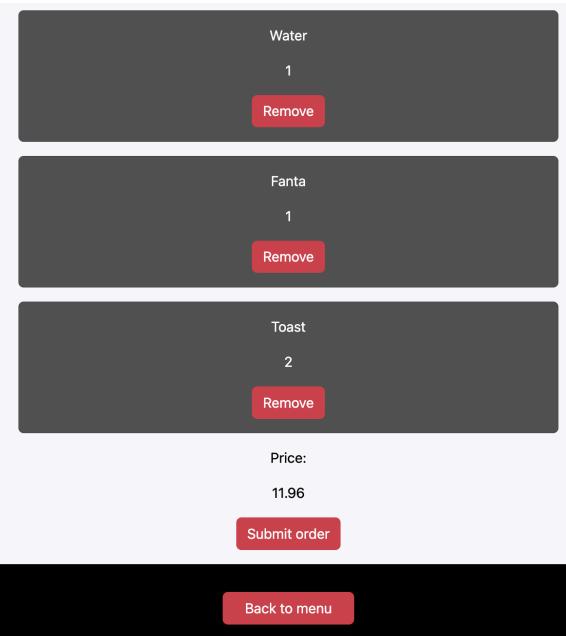

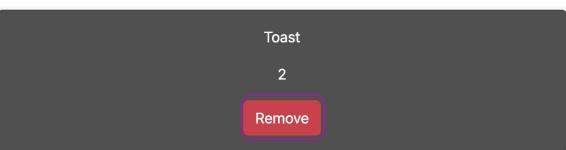

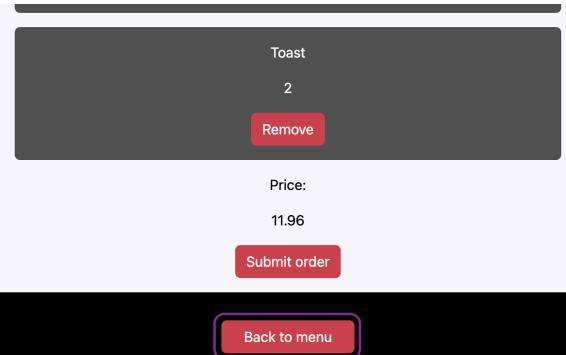

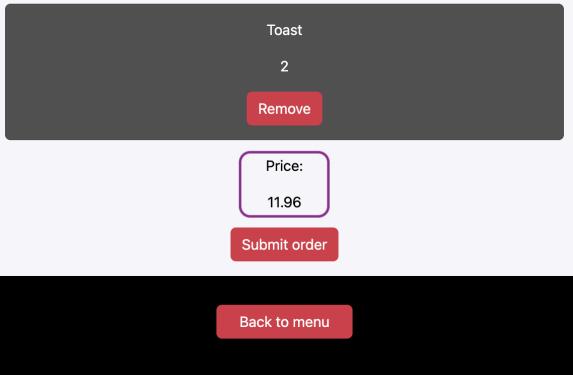

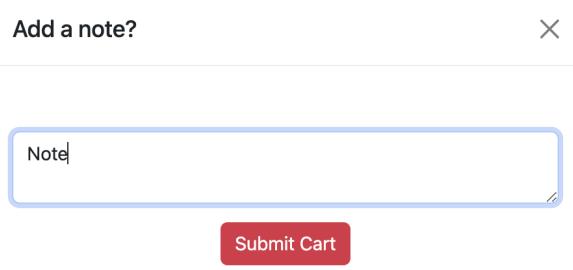

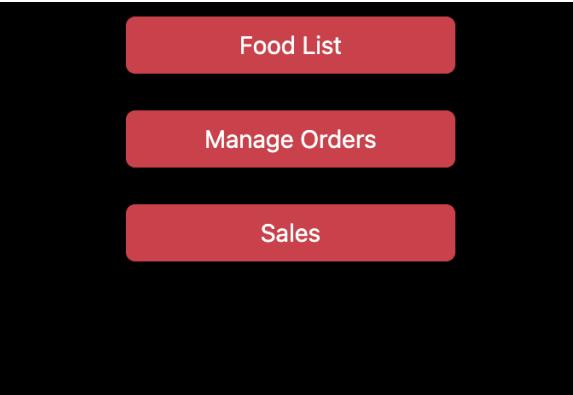

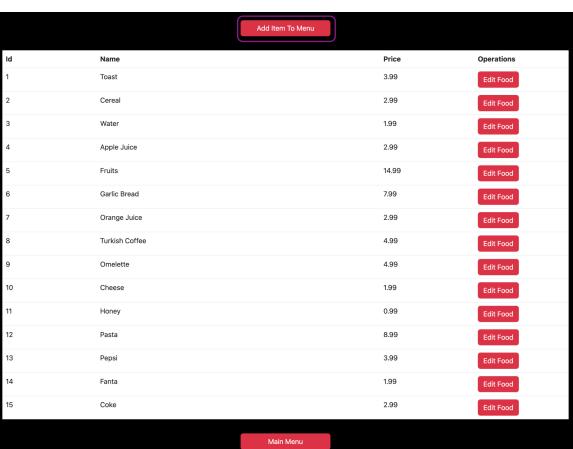

The feedback was positive, however he suggested that it would be great if a search bar could be used to find items from the menu.

Drinks and Foods are held separate in the menu

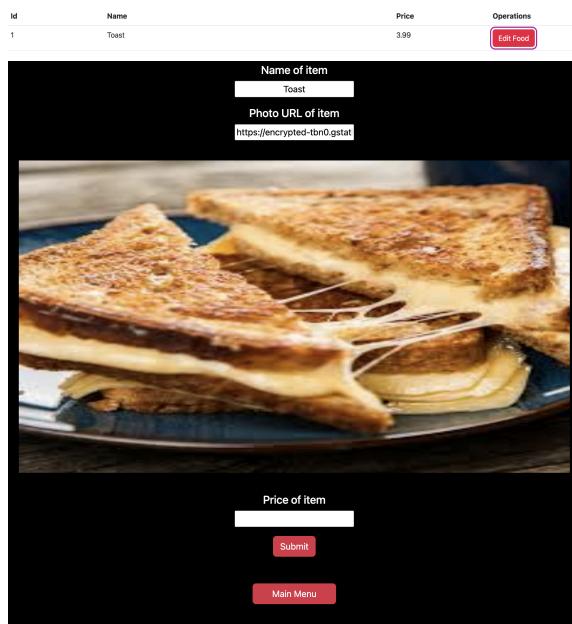

The feedback was positive, expectations were met.

Users can select the number of a product added to the cart		My client said it would be better if the number was changed one by one with - and + buttons.
Users can see everything they are ordering in one cart details page		The feedback was positive, but my client suggested adding the images of products in the admin page as well would be better.
Users can remove items after adding them to their cart		My client suggested that being able to change the number of the item to values other than 0 would be better.
Users can view their cart and return to the menu without ordering (in order to make additions)		The feedback was positive, expectations were met.

<p>Users can see the total price of every item in their cart.</p>		<p>The feedback was positive, expectations were met.</p>																																																																	
<p>Customers can leave a note with their order.</p>		<p>The feedback was positive, expectations were met.</p>																																																																	
<p>There is a separate panel for admins / kitchen staff.</p>		<p>The feedback was positive, expectations were met.</p>																																																																	
<p>Admins should be able to add items to the menu.</p>	 <table border="1"> <thead> <tr> <th>Add item To Menu</th> </tr> <tr> <th>ID</th> <th>Name</th> <th>Price</th> <th>Operations</th> </tr> </thead> <tbody> <tr><td>1</td><td>Toast</td><td>3.99</td><td>Edit Food</td></tr> <tr><td>2</td><td>Cereal</td><td>2.99</td><td>Edit Food</td></tr> <tr><td>3</td><td>Water</td><td>1.99</td><td>Edit Food</td></tr> <tr><td>4</td><td>Apple Juice</td><td>2.99</td><td>Edit Food</td></tr> <tr><td>5</td><td>Fruits</td><td>14.99</td><td>Edit Food</td></tr> <tr><td>6</td><td>Garlic Bread</td><td>7.99</td><td>Edit Food</td></tr> <tr><td>7</td><td>Orange Juice</td><td>2.99</td><td>Edit Food</td></tr> <tr><td>8</td><td>Turkish Coffee</td><td>4.99</td><td>Edit Food</td></tr> <tr><td>9</td><td>Omelette</td><td>4.99</td><td>Edit Food</td></tr> <tr><td>10</td><td>Cheese</td><td>1.99</td><td>Edit Food</td></tr> <tr><td>11</td><td>Honey</td><td>0.99</td><td>Edit Food</td></tr> <tr><td>12</td><td>Pasta</td><td>8.99</td><td>Edit Food</td></tr> <tr><td>13</td><td>Pepsi</td><td>3.99</td><td>Edit Food</td></tr> <tr><td>14</td><td>Fanta</td><td>1.99</td><td>Edit Food</td></tr> <tr><td>15</td><td>Coke</td><td>2.99</td><td>Edit Food</td></tr> </tbody> </table>	Add item To Menu	ID	Name	Price	Operations	1	Toast	3.99	Edit Food	2	Cereal	2.99	Edit Food	3	Water	1.99	Edit Food	4	Apple Juice	2.99	Edit Food	5	Fruits	14.99	Edit Food	6	Garlic Bread	7.99	Edit Food	7	Orange Juice	2.99	Edit Food	8	Turkish Coffee	4.99	Edit Food	9	Omelette	4.99	Edit Food	10	Cheese	1.99	Edit Food	11	Honey	0.99	Edit Food	12	Pasta	8.99	Edit Food	13	Pepsi	3.99	Edit Food	14	Fanta	1.99	Edit Food	15	Coke	2.99	Edit Food	<p>The feedback was positive, expectations were met.</p>

[Finish Order](#)

The feedback was positive, expectations were met.

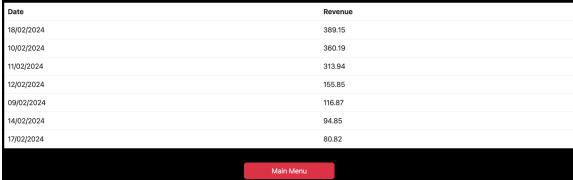

Admins should be able to see in which days how much revenue has been collected		The feedback was positive, but my client said that a statistical bar graph for revenue in the last week could also be added.
Users shouldn't be able to change the URL to access other accounts.	Shown in criteria D.	The feedback was positive, expectations were met.
Customers should be able to select method of payment while ordering	X	Hotel bills are recorded to a customer's room and are paid off at check-out, so this isn't a big issue.

Table 1 - Table which shows the success criteria and where they were met in the website. The purple rings aren't in the website, they are used for highlighting purposes

Recommendations For Further Development

The product met my client's expectations, as he stated in our final interview, it has all the must have functionalities of food ordering systems. However, he also stated some possible additions which can be made to improve the product.

The first one was to widen the range of statistics the sales page gives. While currently it only displays dates and revenue brought in those days, it could be improved by adding a bar chart for clear visualization and to make seeing trends easier for the hotel administration.

Another way in which my product can be further improved is by adding a search bar in the menu for customers. Considering the hotel is gaining popularity and people from around the world will have different tastes, more food options would require more searching and to make this easier a search bar could be implemented. Also, considering the internationality of the hotel and its customers, having the website in multiple languages would be useful to achieve high level customer satisfaction, which is one of the primary goals of my product as my client said in our first interview.

A final thing which could be added to the product can be storing data of ingredients, in addition to products. Currently while the products are easily monitored, the ingredients required to make those products are not, so the hotel staff still have to do manual work outside using my product
